SUMMARY

Full-Stack Developer with hands-on experience building 4+ applications involving REST APIs, backend systems, authentication workflows, and responsive web interfaces using Python, MERN stack, PostgreSQL, and modern development tools. Delivered solutions spanning database management, API integration, dashboard visualization, and scalable application architecture.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab, India
Bachelor of Technology - Computer Science and Engineering August 2020 - March 2026
Courses: Data Structures and Algorithms (DSA), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), Object-Oriented Programming (OOP), Software Engineering, RESTful API Design, Web Application Development

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL, HTML, CSS
- **Frameworks & Libraries:** FastAPI, React.js, Node.js, Express.js, Tailwind CSS, Axios
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Backend:** RESTful APIs, Authentication (JWT, OAuth2), SQLAlchemy, Alembic, Postman
- **DevOps & Tools:** Docker, CI/CD (GitHub Actions), Linux, Pytest, Git, GitHub

PROJECTS

- **InsightX — Financial Intelligence Dashboard** - Ongoing
Tech: React.js, Node.js, Express.js, PostgreSQL, Recharts, REST APIs
 - Built a portfolio analytics dashboard for investment tracking, asset monitoring, and financial reporting through manual entry and CSV-based data uploads.
 - Integrated Yahoo Finance, FMP, and AMFI APIs to display live market prices, historical datasets, and benchmark comparisons across investment categories.
 - Created interactive Recharts visualizations covering profit-loss monitoring, allocation breakdowns, and portfolio performance trend insights.
 - Structured React frontend and Express.js/PostgreSQL backend with theme preferences, persistent settings, and responsive layouts for consistent usability.
- **Smart Job Aggregator for Freshers** January 2026
Tech: MongoDB, Express.js, React.js, Node.js, REST APIs, JavaScript, Git
 - Developed a MERN-based platform consolidating entry-level opportunities from multiple recruitment sources into a centralized browsing interface.
 - Implemented category-based search, filtering routes, and query optimization for faster access to relevant job listings.
 - Managed MongoDB collections with indexed fields and structured schemas to support efficient data storage and retrieval.
 - Integrated reusable React components with REST API endpoints for dynamic content rendering and frontend-backend communication.
- **RESTful API with Authentication & CI/CD Pipeline** March 2026
Tech: Python, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, Docker, GitHub Actions, Pytest
 - Designed a FastAPI backend supporting full CRUD operations, Pydantic schema validation, and relational data handling through PostgreSQL.
 - Configured JWT authentication, OAuth2 password flow, bcrypt hashing, and route-level access controls for endpoint security.
 - Established SQLAlchemy ORM models, foreign key relationships, and Alembic migration workflows for versioned schema handling.
 - Validated API functionality using Pytest test suites and Postman, with Docker containerization and GitHub Actions automation for automated testing workflows.
- **AI Chatbot Assistant** - In Progress
Tech: Python, LangChain, Streamlit, ChromaDB, OpenAI API
 - Engineered a document-ingestion chatbot using LangChain and ChromaDB to enable retrieval-augmented response generation from custom knowledge sources.
 - Incorporated multi-turn conversation memory through LangChain prompt chaining for context-aware query handling across user sessions.
 - Applied embedding-based vector search to improve information retrieval accuracy from uploaded document collections.
 - Deployed an interactive Streamlit interface with document upload support, real-time responses, and environment-based API key configuration.

CERTIFICATIONS

- **Data Structures & Algorithms by Pratik Singhal:** Udemy, May 2024
- **MERN Stack: Zero to Hero:** Fifth Force, July 2022

HONORS AND AWARDS

- Published two papers on Cloud Security.
- Completed CodeBlocks Bootcamp.
